Zeosoft™ is a unique hand cleaner with natural zeolite and soft silica minerals found in New Zealand. Zeosoft™ cleans ingrained grime and dirt and absorbs odours leaving the hands feeling fresh and supple. It continues to clean as it goes back into the environment.

## Zeosoft™ Naturally Different

Other hand cleaners		ZEOSOFT™ HAND CLEANERS
Hard abrasive (pumice) to scour skin, with no other function	X	Soft scouring minerals, that also absorb odours and contaminants
Citric solvents or petrochemical solvents to dissolve oils, grease	X	Not needed
Surfactants (some harsh) for lather and washing	→	Natural, gentler ingredients lather and wash naturally
Must add ingredients (lanolin etc) to repair from solvents, surfactants	→	Minimal - due to the soft natural minerals and ingredients
Add fragrances to cover up the harsh chemicals	X	Not needed - natural Manuka odour
Must add colouring chemicals to cover up other chemicals	X	Not needed - natural colour
Add antibacs etc for sanitization	X	Not needed - natural Manuka Oil used
